Peggy A. Ertmer is an associate professor of Educational Technology at Purdue University. Dr. Ertmer's work, as a former public school teacher and as a current faculty member, is directed toward helping learners become better learners. Current research efforts are directed toward identifying effective instructional strategies and approaches (e.g., case-based instruction, technology integration) that foster student motivation, self-regulation, and learning in both online and face-to-face environments. Recent efforts are focused on identifying effective methods for developing students' problem-solving skills during case-based learning and building teachers' capacity for technology integration by increasing their technology self-efficacy and competence.

Anne T. Ottenbreit-Lefwich is a PhD candidate in the Educational Technology program at Purdue University. She will be starting as an assistant professor of instructional systems technology at Indiana University in January 2007. She has taught both preservice and inservice teachers technology integration strategies and recently worked

with faculty to improve their pedagogical practices. Her current research efforts are focused on exemplary technology use, technology integration, and teacher education programs. She has recently received two grants to incorporate technology integration into teacher education programs, and a third grant to study exemplary technology-using teachers.

Cindy S. York is a PhD student in the Educational Technology program at Purdue University. She has taught students at both the elementary level and university level. Currently she is teaching two courses on integrating technology into the classroom for teacher education students, as well as an online course: Introduction to Educational Technology and Computing. She is working on an NSF grant project for incorporating distance education students into the classroom via virtual learning environments. Her main research interests include online learning and program evaluation as well as preservice teacher education.

Appendix

Exemplary Technology Integration Survey

Thank you so much for your participation in our survey! Completing this survey should take approximately 10 minutes of your time.

Gender: ___ Male ___ Female

Number of years you have taught: _____

Subject you teach: _____

Grade level you teach: _____

Highest university degree completed: _____

Approximate number of additional credits beyond this degree: _____

If you could put your finger on one thing that influenced you the most in terms of integrating technology in your classroom, what would that one thing be?

Rate your current level of computer proficiency:

___ Very high (i.e., I've written some programs/scripts or courseware, and/or could teach others how to use computers)

___ High (I can use computers without referring to manuals/instructions/other help)

___ Average (I use applications like word processing, spreadsheets, and/or basic Web searches)

___ Fair (I can use applications with assistance)

What else could your school do to support your computer use in your classroom? _____

Regarding computers and technology integration, what would you like to learn more about? _____

Describe your most memorable or most useful professional development experience. _____

If given a choice, in which types of professional growth opportunities do you prefer to participate? (Select all that apply.)

___ Workshops and seminars

___ Conferences

___ District or school sponsored courses

___ Online or Web-delivered professional development

___ One-on-one training with technology coordinator or technology aide

___ Group training with technology coordinator or technology aide

___ Release time for department or grade level planning related to technology

___ Release time for individual professional development related to technology

___ Other

If your answer included "other" for the previous question, please explain. _____

If you could make a recommendation to other teachers who wanted to do more with technology in their classrooms, what recommendation would you make? _____

Rate the following elements in terms of the influence they have had on your success in integrating technology in your classroom.

	1 Not Applicable	2 Not influential	3 Slightly influential	4 Moderately influential	5 Extremely influential
Inservice professional development (workshops, conferences, training, etc)					
Current setting—School environment allows for, or encourages, the integration of technology					
Inner drive—Willingness to spend extra or personal time on developing lessons that incorporate technology					
Personal beliefs/attitudes—Beliefs that technology is important to student learning					
Commitment to using computers to enhance student learning					
Time—Opportunities to explore or “play” with new technologies to incorporate into classroom					
Preservice educational experiences					
Key influential people—Mentors or other personal influences on your technology integration					
Confidence—How comfortable you are with technology use					
Previous success with technology					
Previous failure with technology					
Support/encouragement from administration					
Support from parents					
Support from other teachers or peers					
Class size					
Access to technical support					
Access to the Internet					
Access to hardware					
Access to quality software					
Other:					
Other:					

If your answer included “other” in the previous question, please explain. _____

Are there any other experiences that have influenced your use of technology? _____

Thank you for your time!
